## TABLES

## Table No.

## Page No.

1. Federal order minimum class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, January . . . . .	4
2. Number of producers delivering milk to handlers regulated under Federal orders, total deliveries, and average daily deliveries per producer, January . . . . .	6
3. Producer milk deliveries used in Class I and Gross Class I sales by handlers regulated under Federal orders, January . . . . .	8
4. Total fluid items, whole milk, skim milk items, milk and cream mixtures, and cream sold in marketing areas defined by Federal milk orders, for markets where such information is available, December 1964, with comparisons . . . . .	10
5. Total fluid items, whole milk, skim milk items, milk and cream mixtures, and cream sold in marketing areas defined by Federal milk orders, for markets where such information is available, year 1964, with comparisons . . . . .	14
6. Federal milk order Class I formula price information, January. . . . .	18
7. Prices and economic indexes used in Federal milk order formulas to determine January prices, with comparisons . . . . .	19
8. Federal order base and excess prices for milk of 3.5 percent butterfat content, January. . . . .	20
8a. Seasonal incentive fund included under various Federal milk orders, January. . . . .	20

MAJOR ORDER ACTIONS, JANUARY 1965Amendments:

4 markets - Jan. 1 (29 FR 18007-18010, 12/18/64). The amendment retains the present Class I price level in the following markets, relative to that of the Chicago order by establishing in each order a Class I price determined by a stated Class I differential added to the Minnesota-Wisconsin basic formula price, subject to the Chicago supply-demand adjustor: Cedar Rapids-Iowa City, Des Moines, North Central Iowa, and Quad Cities-Dubuque.

Fort Wayne and Indianapolis - Jan. 1 (29 FR 18475-18476, 12/29/64). Amendment continues the current Class I (stated) differentials without change in both orders; and, provides for a common "supply-demand adjustor" to the two markets' Class I prices. Sour cream not labelled "Grade A" is classified as Class II under the Fort Wayne order. The Class I butterfat differential in the Fort Wayne order is reduced to the same level (12 percent of the Chicago butter price) as is provided under the Indianapolis order.

Northeastern Ohio - Jan. 1 (29 FR 18415, 12/25/64). Action eliminates supplies and sales data for the North Central Ohio order from the supply-demand computation in the Northeastern Ohio order.

North Texas - Jan. 1 (29 FR 19235, 12/31/64). Action provides Class II classification for milk that is dumped because buttermilk fails to result from the addition of buttermilk culture to skim milk; also provides that the producer butterfat differential be calculated as an average of the Class I and Class II handler butterfat differentials weighted by the proportion of butterfat in each class.

Northwestern Ohio - Jan. 1 (29 FR 15903, 11/28/64). Merger and expansion of Toledo and North Central Ohio marketing areas; market wide pool; Class I price to be the Minnesota-Wisconsin price series plus stated differentials; Class II price to be the Minnesota-Wisconsin, limited to 10 cents over a butter-powder formula price; other changes from the two previous orders in the producer-handler, classification, allocation, location differential, pool plant, butterfat differential, and diversion provisions.

Suspensions:

Great Basin - Jan. 1 (29 FR 17815, 12/16/64). For the months of January through July, the suspension reduces to 40 percent the receipts of producer milk which must be distributed on routes for pool plant qualification. It also eliminates, from the producer milk used in the computation, that milk which is diverted to a nonpool plant.

St. Joseph - Jan. 1 (29 FR 18152, 12/22/64). For the months of January and February 1965, this suspension reduces from 45 to 35 the percentage of milk receipts which must be utilized in Class I by a distributing plant to maintain pool plant status.

Highlights

January 1965

There are now 76 marketing areas under Federal milk order regulation. In this and forthcoming issues of this publication in 1965, average and total data for all 76 markets will be shown for the months of 1965 and corresponding months of 1964. Also, total and average data for a group of 75 markets will be shown. This 75 market grouping consists of those markets which have been regulated continuously since January 1, 1964, and which have had no significant marketing area expansions since that time. It excludes the Columbus, Ohio, marketing area which was enlarged during 1964. If, during 1965, any of the 75 marketing areas should be enlarged, data for the enlarged areas will be excluded from the group and data will be totaled or averaged for the remaining markets. These 75 markets will be referred to as "comparable" markets, since data for them will not be influenced by regulated markets, or by expansions in present marketing areas.

Fluid milk sales within defined marketing areas will be reported for all but the following markets where it is not possible to accurately determine total sales in the respective areas: New York-New Jersey, Muskegon, Rock River Valley, Fort Smith, Western Colorado, and Colorado Springs-Pueblo. In-area sales represent total fluid sales in each of the areas by handlers regulated under the respective orders, by handlers regulated under other orders, by partially regulated handlers, and by unregulated handlers.

Producer Deliveries. A total of 160,762 producers delivered 4.6 billion pounds of milk to regulated handlers in 75 comparable markets during January 1965. This represents an increase of 3.2 percent over producer deliveries in January 1964. Average daily delivery per producer increased from 857 pounds in January 1964 to 930 pounds in January of this year. Producer numbers, producer deliveries, average butterfat percentages, and average daily deliveries per producer for individual markets are shown on table 2.

Producer Deliveries used in Class I. The volume of producer deliveries used in Class I in 75 markets decreased 0.6 percent from last year, to a total of 2.9 billion pounds for the month of January 1965. Changes in sales from the same month a year ago are influenced by the number of delivery days in the respective periods. In January 1965, there was one less delivery day as compared to January 1964. The average utilization percentage for January was 63 percent, down from 65 percent last year. Eleven markets showed an increase in the utilization percentage, six showed no change, and the remaining 58 markets showed a decrease (see table 3).

Gross Class I sales, which include total Class I sales, in-and-out of defined marketing areas by regulated handlers, decreased 0.7 percent in the 75 markets for the month of January.

Minimum Prices. The weighted average Class I price paid by handlers in the 75 markets for 3.5 percent milk was \$5.08 per hundredweight, nine cents higher than the \$4.99 per hundredweight price in January 1964. Minimum Class I prices for January were higher in 63 markets, unchanged in one market, and lower in the remaining eleven markets.

Producers in the 75 markets received a weighted average blend price of \$4.38 per hundredweight for 3.5 percent milk. This is two cents higher than the January 1964 blend price of \$4.36. Producers received higher blend prices in 46 markets, the same price in three markets, and a lower price in the remaining 26 markets. Class prices, blend prices, and associated butterfat differentials, by markets are reported on table 1.

Whole Milk Sales. Total in-area whole milk sales for January 1965 in 70 marketing areas are estimated to be about 1.9 billion pounds, 1.4 percent below such sales in January of last year. Complete December 1964 in-area sales data for total fluid items, and for the four major fluid product groupings (whole milk, skim milk items, mixtures, and cream), are reported on table 4.

ANNUAL IN-AREA FLUID MILK SALES - 1964

Total fluid milk sales within 71 Federal milk order marketing areas were 24.5 billion pounds in 1964, 2.0 percent above such sales in 1963. Sales of whole milk items, which accounted for 87.2 percent of total fluid sales, increased 1.0 percent from 1963. Skim milk items, representing 10.5 percent of total fluid sales, showed the greatest increase at 12.5 percent over 1963. Sales of both mixtures and cream items were lower in 1964 than in 1963. Mixtures declined 2.2 percent, and cream declined 1.2 percent. Annual in-area sales data are given for individual markets on table 5.

1/ Daily averages and percentages reported for Massachusetts-Rhode Island exclude mixtures and cream. These sales are also excluded from the total for 71 combined areas.

2/ Plain, flavored, and fluid equivalent of concentrated.

3/ The percentage changes are based on adjusted 28-day totals for February 1964 to make them comparable with 1963.

4/ Merger of Boston, Springfield, Worcester, and Southeastern New England, effective October 1, 1964.

5/ Sales for marketing area as defined after 1963 amendment.

6/ Sales for marketing area as defined prior to 1964 amendment.

7/ Plain, fortified, and flavored skim and part skim milk, buttermilk, and cultured specialties.

8/ Excludes Massachusetts-Rhode Island.

9/ Small amount of sales estimated.

1/ Daily averages and percentages reported for Massachusetts-Rhode Island exclude mixtures and cream. These sales are also excluded from the total for 71 combined areas.

2/ Plain, flavored, and fluid equivalent of concentrated.

3/ The percentage changes are based on adjusted 28-day totals for February 1964 to make them comparable with 1963.

4/ Merger of Boston, Springfield, Worcester, and Southeastern New England, effective October 1, 1964.

5/ Sales for marketing area as defined after 1963 amendment.

6/ Sales for marketing area as defined prior to 1964 amendment.

7/ Plain, fortified, and flavored skim and part skim milk, buttermilk, and cultured specialties.

8/ Excludes Massachusetts-Rhode Island.

9/ Small amount of sales estimated.
